

Talend Workshop March 06

One Canada Square, London
From 12:45pm to 5:30pm

Talend Workshop

Is a free-to-attend practical session with no commitments required.

Join us to explore how to **integrate** all data sources into a clean, complete, and compliant source of truth.

Addressing disparate data sources

Have you ever wondered how to tackle varied formats and inconsistent structures?

You may not be the only one; many teams still struggle as integrating information from databases, applications, and files becomes a convoluted process

At the same time, data quality is another hurdle; ensuring accuracy in a sea of diverse datasets proves challenging.

So, within this intricate web of data scenarios, what type of solutions best suit your needs?

What is Talend?

01 Collect data from multiple sources and transform it to power all your business decisions

Talend is an open-source data integration and management platform. The platform is designed to simplify the process of collecting, transforming, and managing data from different sources within an organization.

Why attend the **Talend** workshop?

Learn how to connect all your data sources into a clean, complete, and compliant source of truth.

Integrate Data

We will explore how Talend Data Integration lets you connect and manage all your data, no matter where it lives.

Drive business outcomes

with a modular solution that can support your data needs at any scale. As a cloud-independent solution, Talend can help you work seamlessly across your data landscape.

Forward-Thinking Learning

Our workshop is designed for forward-thinking professionals. If your company embraces innovation, this is your chance to stay ahead in the ever-evolving landscape of data management.

How can a tool like Talend impact you?

Data Analyst – for data analysis by automating data integration processes, allowing you to focus on extracting insights rather than data preparation.

Business Intelligence (BI) Developer – to ensure compliance and governance across diverse data sources.

IT Manager – to expedite BI project development by facilitating rapid data pipeline creation and seamless connectivity to various data sources.

Agenda

12:45pm – 1pm

Registration & Technical Assistance

1:00pm – 1:45pm

Introduction to Talend and Data Integration Basics

1:45pm – 2:00pm

Coffee Break

2:00pm – 2:45pm

Advanced Talend Features and Transformations

2:45pm – 3:00pm

Coffee Break

3:00pm – 3:45pm

Integration with External Systems

3:45pm – 4:00pm

Coffee Break

4:00pm – 4:45pm

Automation, Deployment, and Best Practices

4:45pm – 5:30pm

Networking & Drinks
